Due to its success, an AutoCAD version has been available since 1985. In 2014, there were more than 260 million registered AutoCAD users. Since 2016, AutoCAD has been available in 64-bit versions only, but still there are some AutoCAD 2007 users. The AutoCAD 2017 for Mac is a native application and the native AutoCAD 2016 has been discontinued. AutoCAD Architecture Starting with AutoCAD Release 16, all the AutoCAD products are based on the same architecture. The AutoCAD Architecture defines the functionality, characteristics and attributes of AutoCAD applications. AutoCAD Architecture defines the AutoCAD Product, the Autodesk Infrastructure and the AutoCAD Application. The Autodesk Infrastructure is the infrastructure component of the AutoCAD Application. It includes the Autodesk Application Framework (AAF), Core Services, and the Autodesk Exchange. AAF provides a common infrastructure across AutoCAD applications. AAF works with the underlying system and web services to create, connect, and manage an application. Core Services provides the data persistence, data analysis, and help features of the AutoCAD Application. Autodesk Exchange is a social platform that allows AutoCAD users to collaborate and share ideas, information and insights, e.g. among team members or even with the community at large. The AAF, Core Services, and Autodesk Exchange are all part of AutoCAD 2017 for Mac. AutoCAD Application AutoCAD Application is an individual AutoCAD application. Starting with Release 16, each AutoCAD product includes a single AutoCAD Application. AutoCAD Application also includes the following components: AutoCAD User Interface (UI) - is a user interface to perform functions of AutoCAD Application. The user interface (UI) is the main focus of a AutoCAD product. The UI includes the User Interface Library (UIL) and toolbars. UIL is the user interface library and is built using JavaScript and HTML. It is used for providing flexibility in creating the user interface. The toolbars provide the placeholders for text, menus, buttons, etc. - is a user interface to perform functions of

AutoCAD LT (AutoCAD Technology Edition) In November 2010, Autodesk announced the discontinuation of AutoCAD LT. Users can no longer purchase AutoCAD LT licenses through the AutoCAD Product Line, nor can they download software to the older editions. New releases will only be available for Windows 7, Windows Vista, and Windows XP. The discontinuation of AutoCAD LT, along with the pending bankruptcy of AcuDraw, were seen as a major failure of the development model, since AcuDraw was integrated into AutoCAD, and the AutoCAD LT license was never formally released as a standalone product. AutoCAD 2018 The new release is version 2018 and AutoCAD LT 2018. This is the first version of AutoCAD since its discontinuation in 2011.
